

Performance Medicine Operational Specification

PM Operational Specification | Form 2 | v0.1

STRIKERS Elite Sports Group | University of St Andrews

About this document

The Performance Medicine Operational Specification defines the domain-level purpose, responsibilities, and core functions of a Performance Medicine system. It serves as a live commissioning document and governance reference, not a one-time audit tool. It is structured across nine operational sub-components and uses a Foundation / Established / Advanced maturity model to characterise the level of provision.

This document is intended to be completed by the senior Performance Medicine lead in consultation with system stakeholders. It should be version-controlled and reviewed at least annually or following significant system change.

Section A — Setting and Context

Organisation / system name	
Setting type	Elite sport / Military / Corporate / Clinical / Other (specify)
Sport or domain	
Performance system level	International / National / Regional / Club / Individual
System lead / responsible person	
Document version and date	
Review date	
Document purpose	Commissioning / Governance reference / Annual review / System redesign / Other

Section B — PMIF Domain Coverage

For each PMIF domain, describe the provision in this system, confirm whether it is in scope, and note any local adaptations or context-specific considerations. Reference the current PM-NEAT assessment if available.

Section / Domain	Description of provision in this system	In scope?	Notes / local adaptation
1. Medical			
1.1 Sport and Exercise Medicine			
1.2 Lifestyle and Preventative Medicine			
1.3 Emergency and Acute Care			
1.4 Specialist Liaison and Referral			
2. Psychological			
2.1 Performance Psychology			
2.2 Clinical Psychology and Mental Health			
2.3 Psychological Load Management			
2.4 Psychosocial Environment			
2.5 Cognitive Performance			
2.6 Welfare, Crisis and Safeguarding			
3. Allied Health and Scientific			
3.1 Physiotherapy and Rehabilitation			
3.2 Nutrition and Dietetics			
3.3 Strength, Conditioning and Exercise Science			
3.4 Sport and Exercise Physiology			
3.5 Biomechanics and Movement Science			
3.6 Sleep, Recovery and Load Monitoring			
4. Technical			
4.1 Data Systems and Performance Analytics			
4.2 Performance Testing and Assessment			

Section / Domain	Description of provision in this system	In scope?	Notes / local adaptation
4.3 Technology and Digital Integration			
4.4 Research and Performance Science			
4.5 Environment, Facility and Equipment Management			
4.6 Operational Logistics and Coordination			
5. Clinical Practice (OA)			
5.1 Governance and Clinical Accountability			
5.2 Clinical Decision-Making and Pathways			
5.3 Documentation and Information Governance			
5.4 Safeguarding and Duty of Care			
6. Education and Development (OA)			
6.1 Staff CPD and Professional Development			
6.2 Mentorship and Workforce Development			
6.3 Education for Performers and Teams			
6.4 Workforce Pipeline and Training Capacity			
7. Research and Knowledge Translation (OA)			
7.1 Service Audit and Quality Improvement			
7.2 Research Engagement			
7.3 Evidence-Informed Practice			
7.4 Knowledge Dissemination and Translation			

Section C — Operational Structure

Complete each of the nine sub-components below. The maturity descriptor table at the end of this section provides reference criteria.

C1 — Purpose and scope

Define the overarching purpose of this Performance Medicine system and the boundaries of its scope within the organisation.

Mission statement	
Scope (what is included)	
Out of scope (explicit exclusions)	
Current maturity level	Foundation Established Advanced

C2 — Population and user group

Define the performers and stakeholders served by this system.

Primary performer group	
Number of performers	
Level and roles	
Secondary user groups (staff, coaches, families)	
Current maturity level	Foundation Established Advanced

C3 — Domain coverage

Summarise the overall domain coverage of the system. Detail is captured in Section B.

Domains with full provision	
Domains with partial or developing provision	
Domains not currently in scope	
Current maturity level	Foundation Established Advanced

C4 — Team structure

Define the composition, roles, and reporting structure of the Performance Medicine team.

Team lead role and title	
Core team members (role and WTE)	
Associated / sessional staff	
Reporting structure	
Inter-professional collaboration arrangements	
Current maturity level	Foundation Established Advanced

C5 — Governance and accountability

Define clinical governance arrangements, accountability structures, and regulatory compliance.

Clinical governance lead	
Accountability framework	
Regulatory registrations and standards	
Safeguarding and duty of care arrangements	
Current maturity level	Foundation Established Advanced

C6 — Information systems

Define the data, record-keeping, and information governance arrangements.

Medical record system	
Performance data platforms	
Information sharing protocols	
GDPR / data protection compliance	
Current maturity level	Foundation Established Advanced

C7 — Decision-making pathways

Define the key clinical and operational decision-making processes and pathways.

Return-to-performance pathway	
Referral pathways (internal and external)	
Emergency and acute care pathway	
Mental health and welfare pathway	
Shared decision-making arrangements	
Current maturity level	Foundation Established Advanced

C8 — Evaluation expectations

Define how the system will be monitored, audited, and evaluated.

Key performance indicators	
Audit and quality improvement cycle	
Outcome reporting arrangements	
Review frequency	
Current maturity level	Foundation Established Advanced

C9 — Required resources and enabling conditions

Define the resource requirements and enabling conditions necessary for the system to function as specified.

Workforce requirements	
Facility and equipment requirements	
Budget and financial resources	
Technology and data infrastructure	
Organisational enablers (leadership, culture)	
Current maturity level	Foundation Established Advanced

Maturity Model Reference

Use the following descriptors when assigning maturity levels for each sub-component.

Sub-component	Foundation	Established	Advanced
Purpose and scope	Informally understood; not documented	Documented purpose; clear scope boundaries; known to key staff	Embedded in strategy; regularly reviewed; communicated across organisation
Population and user group	Informally known; not formally defined	Defined population; roles documented; needs assessment completed	Dynamic population profiling; stratified needs; reviewed annually
Domain coverage	Ad hoc provision; significant gaps	Core domains covered; gaps identified and planned for	Comprehensive coverage; all PMIF domains addressed; gaps monitored
Team structure	Single or informal; no defined structure	Defined roles; reporting lines established; MDT meetings in place	Full interdisciplinary team; formalised governance; succession planning
Governance and accountability	No formal governance; ad hoc accountability	Clinical lead identified; basic governance in place; policies documented	Full governance framework; external audit; professional standards met
Information systems	Paper-based or informal; no integration	Electronic records in use; basic data sharing; GDPR compliant	Integrated data ecosystem; real-time dashboards; full IG compliance
Decision-making pathways	Informal; case-by-case; not documented	Key pathways documented; MDT decision-making; referral pathways clear	All pathways formalised; shared decision-making embedded; regular review
Evaluation expectations	No formal evaluation; outcomes not tracked	KPIs defined; annual audit; basic outcome reporting	Continuous evaluation; external benchmarking; published outcomes
Resources and enabling conditions	Under-resourced; significant gaps; ad hoc	Core resources in place; budget allocated; enabling conditions identified	Fully resourced; strategic investment; enabling conditions optimised

Section D — Governance and Resources

D1 — Document control

Field	Entry	Notes
