

Performance Medicine Assessment Tool

PM-NEAT | Form 1 | v0.1

STRIKERS Elite Sports Group | University of St Andrews

About this tool

The Performance Medicine Assessment Tool (PM-NEAT) is a structured dual-purpose instrument derived from the Performance Medicine Integrative Framework (PMIF). It supports both prospective needs evaluation and evaluative service assessment across all PMIF domains.

Function 1 (Needs Evaluation, Form 1.1) — Prospective: what does this setting require? Use before service design or commissioning.

Function 2 (Service Assessment, Form 1.2) — Evaluative: how well does current provision meet need? Use to audit an existing service.

Function 3 (Gap Analysis, Form 1.3) — Combined: both functions completed together. Use when reviewing and redesigning a service.

This document is Form 1.3 (Gap Analysis). Complete Orientation, then rate each domain for Anticipated Need and Current Provision. The Gap score is calculated automatically as Need minus Provision.

Rating guide

Need rating	0 = Not applicable	1 = Low need	2 = Moderate need	3 = High need
Provision rating	0 = None	1 = Limited / ad hoc	2 = Partial / developing	3 = Established
Gap score	Need minus Provision	Red ≥ 2 (priority action)	Amber = 1 (development)	Green ≤ 0 (met / exceeded)

Orientation

Client / organisation	
Setting type / function / level / sport or domain	
Performers: who / numbers / level / roles	
Date(s) of assessment	
Assessor(s)	
Purpose / trigger for assessment	
Previous assessment?	Yes No Unknown
Aims and objectives	
Key performance indicators	
Timeline: near / medium / longer term	
Existing Performance Medicine components	
Specific requests or constraints	

Section 1 — Medical

1. Medical				
Domain	Domain description	Need (0-3)	Provision (0-3)	Gap / Notes
1.1	Injury diagnosis, management and medical oversight of athletes and performers			
1.2	Health promotion, chronic disease prevention and lifestyle optimisation			
1.3	Emergency medical provision and acute illness/injury response in performance settings			
1.4	Coordination with external specialists, secondary and tertiary care pathways			

Section 2 — Psychological

2. Psychological				
Domain	Domain description	Need (0-3)	Provision (0-3)	Gap / Notes
2.1	Mental skills, psychological readiness and performance optimisation			
2.2	Assessment and treatment of mental health conditions in performers			
2.3	Monitoring and managing psychological stress, burnout and recovery			
2.4	Team culture, relationships, social dynamics and environmental factors			
2.5	Attention, decision-making, cognitive load and brain performance			
2.6	Duty of care, safeguarding frameworks and crisis response			

Section 3 — Allied Health and Scientific

3. Allied Health and Scientific				
Domain	Domain description	Need (0-3)	Provision (0-3)	Gap / Notes
3.1	Musculoskeletal assessment, rehabilitation and return-to-performance pathways			
3.2	Nutritional assessment, fuelling strategies and body composition management			
3.3	Physical preparation, training load prescription and performance development			
3.4	Physiological monitoring, VO2max, lactate testing and endurance management			
3.5	Movement analysis, technique optimisation and injury biomechanics			
3.6	Sleep quality, recovery interventions and training load quantification			

Section 4 — Technical

4. Technical				
Domain	Domain description	Need (0-3)	Provision (0-3)	Gap / Notes
4.1	Data infrastructure, performance analysis platforms and reporting			
4.2	Standardised testing protocols, benchmarking and monitoring systems			
4.3	Wearables, GPS, biometric monitoring and digital health tools			
4.4	Applied research, evidence generation and performance science capability			
4.5	Training environments, medical facilities and equipment provision			
4.6	Travel, scheduling, camp management and multi-site operations			

Section 5 — Clinical Practice

Overarching aspect — applies across all four quadrants

5. Clinical Practice				
Domain	Domain description	Need (0-3)	Provision (0-3)	Gap / Notes
5.1	Clinical governance structures, accountability frameworks and regulatory compliance			
5.2	Shared decision-making protocols, care pathways and inter-professional consultation			
5.3	Medical record systems, GDPR compliance and information sharing protocols			
5.4	Child protection, adult safeguarding, consent frameworks and duty of care obligations			

Section 6 — Education and Development

Overarching aspect — applies across all four quadrants

6. Education and Development				
Domain	Domain description	Need (0-3)	Provision (0-3)	Gap / Notes
6.1	Continuing professional development, training and competency frameworks for PM staff			
6.2	Clinical supervision, mentorship structures and talent pipeline development			
6.3	Health literacy, performance education and informed self-management for performers			
6.4	Placement, internship and workforce development programmes			

Section 7 — Research and Knowledge Translation

Overarching aspect — applies across all four quadrants

7. Research and Knowledge Translation				
Domain	Domain description	Need (0-3)	Provision (0-3)	Gap / Notes
7.1	Clinical audit cycles, outcome monitoring and service improvement processes			
7.2	Participation in research, ethics governance and academic collaboration			
7.3	Integration of current best evidence into practice decisions and protocols			
7.4	Publication, conference engagement and knowledge translation to practice			

Synthesis and Summary

Section	Total Need	Total Gap	Priority RAG	Key observations
1. Medical				
2. Psychological				
3. Allied Health and Scientific				
4. Technical				
5. Clinical Practice				
6. Education and Development				
7. Research and Knowledge Translation
